

Bridging **Global Markets**

IN PLASTICS, CHEMICALS, AND RUBBER

www.multitradegroup.com

ABOUT US

Who we are

Since 1996, Multi Trade Group has enabled over 12,000 converters to source 600,000 MT of polymers annually, making us a trusted partner for the world's leading producers.

With our headquarters in the United Arab Emirates and a robust network of sales offices and warehouses across the Middle East, Asia, Africa, Europe, and the Americas, we connect leading producers with global markets.

Our commitment to innovation, reliability, and technical expertise ensures we deliver tailored solutions that meet the dynamic needs of our partners and customers. By bridging supply chains with precision and efficiency, we empower industries worldwide to thrive.

Our mission

Global Reach

Local Expertise

At Multi Trade Group, we are dedicated to delivering essential polymers and raw materials directly to plastic converters worldwide. Through our strategically located warehouses and distribution hubs, we optimize delivery schedules, minimize lead times, and provide unparalleled local market insights.

Why partner with Multi Trade Group?

We are the preferred distributor for leading producers, offering a unique combination of strengths to support global supply chains:

Global Reach. Local Expertise.

Our distribution network spans five continents, enabling us to deliver materials efficiently to high-demand markets. Our strategically located hubs ensure optimized schedules and tailored solutions to meet specific market needs.

Seamless Logistics for Just-in-Time Delivery

With streamlined supply chain solutions, we guarantee rapid, reliable delivery. Our custom logistics strategies minimize disruptions and maximize efficiency, helping our partners maintain a competitive edge.

Dedicated Credit Lines for Growth

We offer flexible credit facilities to empower our partners with enhanced purchasing power, faster decision-making, and the ability to increase turnover and scale operations without being constrained by working capital limitations.

Reliability and Consistency

Backed by over 2 million square feet of global warehousing across 15 countries and partnerships with key logistics providers, we deliver on time, every time, ensuring continuity even amidst external challenges.

Expansive Market Access

Serving a customer base of 12,000+ across diverse industries, we help producers increase sales channels, enhance market penetration, and boost sales volumes globally.

Compliance and Safety Excellence

We adhere to strict safety, environmental, and regulatory standards, aligning with both local and international requirements.

Deep Industry Technical Expertise

Our team of experts in every region possesses deep technical knowledge of polymers and plastics, covering all grades, applications, and processing methods. This expertise enables us to provide customers with tailored advice on material selection, fostering more informed buying decisions. Each regional office operates with its own dedicated sales team, guided by an experienced country manager.

Value-Added Services

Beyond distribution, we provide services like blending, custom formulations, compounding, and product testing, helping producers and customers enhance their product offerings.

Unmatched Agility

We are responsive and adaptable, capable of swiftly adjusting to fluctuations in demand, raw material shortages, and logistical constraints. Our agile approach ensures that we meet market demands and maintain supply chain efficiency.

Transparency and Trust

We prioritize open communication and proactive updates, ensuring transparency in pricing, delivery timelines, and potential challenges.

Our capabilities

Global Warehousing:

Over 2 million square feet of capacity across 15 strategic locations.

Packaging Facility:

Advanced infrastructure in Sharjah, UAE, capable of transferring materials from rail cars to FFS bags for local and international distribution.

Integrated Logistics:

Strategic alliances with DP World and freight forwarders to provide end-to-end supply chain solutions with advanced technical platforms.

Driving sustainability:

Our commitment to a greener future

At Multi Trade Group, sustainability is at the core of our operations. Through our dedicated compounding and finished goods production facilities, we actively integrate environmentally friendly practices into our business model.

Innovative Recycling Initiatives:

We incorporate Post-Industrial Recycled (PIR) materials in our production processes to support sustainable and eco-friendly projects. Plans are underway to expand into Post-Consumer Recycled (PCR) and Post-Industrial Compound (PIC) resins, blending 30-50% recycled content with 50-70% virgin resin, certified by the Global Institute.

Green Business Leadership:

Multi Trade Group stays ahead of market trends, embracing green business practices across our portfolio. We partner with global suppliers to offer recycled materials such as r-PET and r-HDPE, ensuring we meet the growing demand for sustainable products.

Supporting Environmental Goals:

By integrating recycled materials into our manufacturing and trading operations, we reduce waste, conserve resources, and actively contribute to a more sustainable future.

Our commitment to sustainability reflects our dedication to creating value for our customers while protecting the environment for future generations.

Our track record

With a portfolio of over 12,000 global clients and a distribution network handling 600,000 MT annually, Multi Trade Group is a trusted partner for some of the world's largest oil and gas suppliers.

Our reputation is built on reliability, integrity, and our ability to innovate in a fast-changing market.

Portfolio

Plastics

Multi Trade Group offers a wide range of polymers to serve diverse industrial and consumer applications:

Polyethylene (PE):

- Low-Density Polyethylene (LDPE)
- Linear Low-Density Polyethylene (LLDPE)
- High-Density Polyethylene (HDPE)
- High Molecular Weight Polyethylene (HMWPE)
- Metallocene Polyethylene (mPE)

Polypropylene (PP):

- Homopolymers
- Copolymers

Polyvinyl Chloride (PVC):

- Suspension PVC
- Emulsion PVC
- Chlorinated PVC (C-PVC)

Polyethylene Terephthalate (PET):

- Bottle Grade

Styrenics:

- General Purpose Polystyrene (GPPS)
- High Impact Polystyrene (HIPS)
- Expandable Polystyrene (EPS)
- Acrylonitrile Butadiene Styrene (ABS)

Engineering Plastics:

- Polycarbonate (PC)
- Polyamide (PA) / Nylon

- Polyoxymethylene (POM) / Acetal
- Polyphenylene Sulfide (PPS)
- Polyetheretherketone (PEEK)
- Polymethyl Methacrylate (PMMA)

Biodegradable and Recycled Polymers:

- Polylactic Acid (PLA)
- Polyhydroxyalkanoates (PHA)
- Post-Consumer Recycled (PCR) and Post-Industrial Recycled (PIR) Plastics

EVA (Ethylene Vinyl Acetate):

- Applications in footwear, adhesives, and solar encapsulation

Specialty Films:

- BOPP (Biaxially Oriented Polypropylene)
- BOPET (Biaxially Oriented Polyester)
- Barrier Films

Masterbatches:

- Color, additive, and functional masterbatches for various plastic applications

Off-Grades and Recycled Polymers:

- Wide-spec resins and recycled plastics for sustainable solutions

Rubber

Comprehensive range of synthetic and natural rubber products for industrial and consumer applications:

Synthetic Rubber:

- Ethylene Propylene Diene Monomer (EPDM) and EPM
- Styrene Butadiene Rubber (SBR) and Solution SBR (SSBR)
- Nitrile Butadiene Rubber (NBR)
- Thermoplastic Rubber (TPR)
- Butyl Rubber (IIR)
- Chloroprene Rubber (CR)
- Acrylate Rubber (ACM)
- Fluoroelastomers (FKM)

Natural Rubber:

- Latex
- Standard and specialty grades

Chemicals and additives

Wide selection of specialty chemicals and additives to enhance product performance:

Pigments:

- Titanium Dioxide (TiO₂)
- Carbon Black
- Red Iron Oxide

Waxes and Stearates:

- Chlorinated Paraffin Wax
- Zinc Stearate

Plasticizers:

- Dioctyl Phthalate (DOP)
- Diisononyl Phthalate (DINP)
- Dibutyl Phthalate (DBP)
- Bio-Based Plasticizers

Surfactants:

- Sodium Lauryl Ether Sulfate (SLES)
- Linear Alkylbenzene Sulfonic Acid (LABSA)

Lubricant Additives:

- Total Base Number (TBN)
- Pour Point Depressants (PPD)
- Oil Modifiers
- Additive Packages

Glycols:

- Diethylene Glycol (DEG)
- Monoethylene Glycol (MEG)
- Polyethylene Glycol (PEG)

Antioxidants and UV Stabilizers:

- Hindered Amine Light Stabilizers (HALS)
- Benzotriazole UV Absorbers

Flame Retardants:

- Halogenated and non-halogenated options

Catalysts:

- For polymerization and specialty applications

Specialty Coatings:

- Polyurea, fluoropolymer coatings, and silicone-based coatings

Industries we serve

Packaging

Flexible films, bags, pouches, shrink wraps, and rigid containers for food, industrial, and consumer applications.

Automotive

Lightweight and durable polymers for interiors, exteriors, seals, and under-the-hood applications.

Infrastructure and Construction

High-performance materials for pipes, geomembranes, cables, insulation, and structural components.

Healthcare & Medical

Advanced polymers for medical packaging, drug delivery systems, diagnostic devices, and hospital equipment.

Industrial Applications:

Agricultural films, industrial liners, gaskets, automotive parts, and specialty components.

Electronics

Conductive plastics, insulation materials, and protective casings for electronic and electrical applications.

Consumer Goods

Durable and lightweight plastics for household items, personal care products, and appliances.

Strategic Partnerships

We leverage alliances with key logistics providers and trucking companies to ensure seamless delivery. Our partnership with DP World positions us to serve one of the fastest-developing regions in the world, enhancing efficiency through advanced logistics platforms and multimodal transportation.

Where we operate

Ensure seamless supply chain operations with our expansive warehousing infrastructure of over 2,000,000 SF holding capacity, designed to handle large volumes, reduce lead times, and provide just-in-time delivery.
